

National Bioskills Live Connect™

INTERACTIVE LIVESTREAM TECHNOLOGY
Real-time Remote Training

Live Collaboration

This virtual training solution empowers medical device companies to conduct remote events from any lab with the push of a button. Attendees can view up to four camera angles at a time and join the conversation via live audio conference.

Easy Access, Easy Use

The Live Connect kit plugs in and streams to the world—no downloads or apps required. Attendees join the livestreaming event through a secure web page, while you and any remote moderators self-direct the cameras.

Stream From Any Device

Designed by medical education experts, National Bioskills Live Connect™ uses medical-grade hardware to stream from any camera or medical device. Enterprise technology ensures optimized speed, reliability and ability to scale.

National Bioskills Live Connect™ is a cloud-compatible solution developed by National Bioskills Laboratories in collaboration with technology partner CrowdOptic, exclusively for use in medical education.

PLUG-AND-PLAY MOBILITY

- Complete kit shipped to your lab or use our facilities
- Stream from any medical device with video output
- No downloads or apps required

ENTERPRISE TECHNOLOGY

- Video latency < 0.2 seconds
- Secure encrypted video
- HIPAA-compliant

FLEXIBLE PRICING

- Choice of plans to fit your needs

LIVE TECH SUPPORT

- U.S.-based expert engineers
